Education

Indian Institute of Information Technology Vadodara **2023 – 2027**

Bachelor of Technology in Information Technology *CGPA : 7.9*

Courses: *Operating Systems, Data Structures and Algorithms, Object-Oriented Design and Analysis, Database Management Systems*

Experience

Yugant Industries Private Limited **Dec 2025 – Mar 2026**

Backend Developer Intern *Remote*

- Engineered production backend APIs using **Supabase Edge Functions**, supporting workflows for **48,940 active customers** and **1,038 sellers**.
- Optimized image storage within Supabase's **1GB free tier**, supporting assets for **10,380 products**.
- Tuned **PostgreSQL schemas and SQL queries** to efficiently handle traffic across **48,940 customers** and **1,038 sellers**.
- Delivered an **admin dashboard** for centralized application data and workflow management, streamlining internal operations.

Indian Knowledge Systems **Aug 2025 – Jan 2026**

Project Intern – React Native Developer *Remote*

- Curated **20+ regional poems each** from Uttar Pradesh and Gujarat for a **4-state dataset**.
- Structured and mapped regional content into the application's **data model**, ensuring consistent data representation.
- Integrated **REST APIs** with React Native components for dynamic content retrieval and application workflows.
- Collaborated with the engineering team to design, develop, test, and ship application features from planning through release.

Projects

Nemo AI Operating System Assistant | React.js, Node.js, Express.js, Gemini API, Puppeteer, Web Speech API **Link**

- Engineered an AI assistant with **15+ custom tools** for browser automation, terminal execution, and file management.
- Enabled voice-based system control using **wake-word detection, Speech Recognition, and Text-to-Speech**.
- Created a real-time dashboard to monitor **AI responses, command history, and tool-execution logs**, improving system visibility.

CoCode | React.js, Node.js, Express.js, Socket.io, MongoDB, Gemini AI API **Link**

- Developed a real-time collaborative code editor with **4 core features**: live sync, multi-file editing, chat, and auto-save.
- Leveraged Gemini API with **6 AI capabilities**: code completion, debugging, explanation, review, optimization, and testing.
- Created a VS Code-like IDE using **Monaco Editor** with multi-language support, code execution, and AI assistance.

Decentralized E-Voting System | Ethereum, Solidity, MetaMask, React.js, Node.js, MongoDB **Link**

- Built a blockchain-based e-voting system supporting **100+ simulated votes** with a tamper-resistant design.
- Deployed **3 Solidity smart contracts** on Ethereum for authentication, candidate management, and vote storage.
- Integrated a **Node.js backend with MongoDB** for vote tracking and automated result computation.

Achievements

- Solved **700+ DSA problems** on **LeetCode** and **900+ problems** on **GeeksforGeeks**.
- Won **1st Place** at **HackIIITV 2025** among **50+ teams**. Certificate

Technical Skills

Languages	C++, C, JavaScript, Python, SQL
Frameworks	React.js, Redux, Tailwind CSS, Node.js, Express.js
Databases	PostgreSQL, MongoDB, MySQL, Supabase
AI	Gemini API, AI Agents, RAG, Function Calling, Prompt Engineering
Blockchain	Ethereum, Solidity, Hardhat, Ethers.js
Tools	Git, GitHub, Docker, Linux, Postman
Soft Skills	Leadership, Communication, Problem Solving, Teamwork
